

## Home Learning Guide

The table below shows which platform each subject is using to set work and provide feedback for students, as you will see this is usually using part of the Office 365 suite.

Each teacher will send an email with an outline of the work set for the week identifying any work due for hand in. The schedule for when emails will be sent to students for each subject is in the table below.

Students are not expected to do all of the work on the day it is set and they will need to plan the work out over the week in the way that best suits them.

Many students find it helpful to use their school planner to write down what they need to do over the week. We will also be sending out guidance to help students manage their emails.

Below is a link to Office365 which contains Teams, OneNote and Forms. Office 365 also provides word, excel and powerpoint for everyone. Students will need to use their school email to log in. Students should contact subject teachers by email if they need any additional help.

[Office 365](#)
